Alumni Report 2019 - 2025

The Career Development Center (CDC) of Soran University is collecting graduate data to better understand the university's alumni community, including their **academic background, employment status, place of residence, and place of work**. The data collected so far represents a portion of the university's graduates, as the university graduates **more than 1,000 students each year**, and the survey is still ongoing.

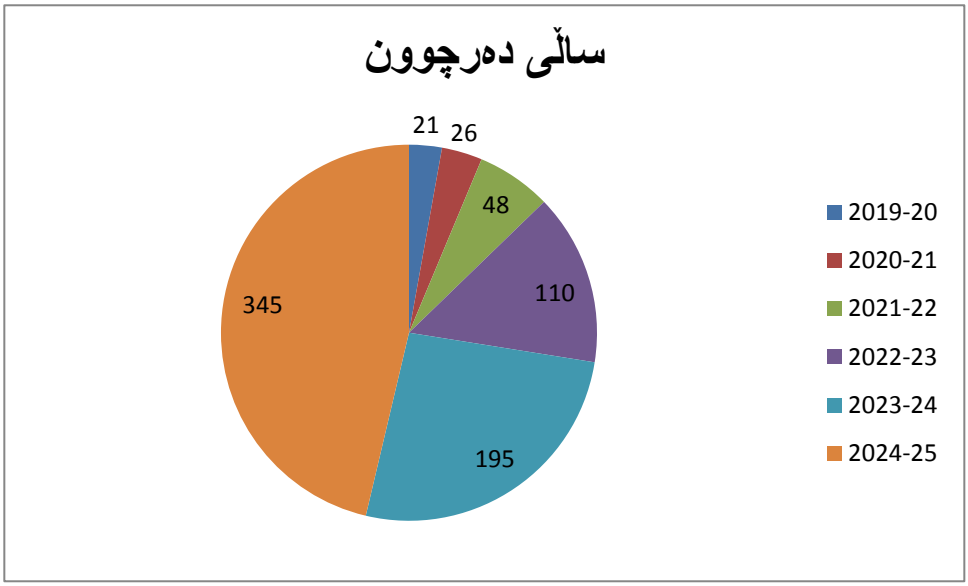

Based on the responses collected to date, **777 graduates** have completed the survey. Respondents come from **more than 28 departments across all five faculties**, with the **English Department** recording the highest number of responses. Regarding their latest academic degree, **675 respondents hold a Bachelor's degree, 91 hold a Master's degree, and 11 hold a PhD**.

In terms of employment, **518 graduates reported that they are currently working**, while **259 reported that they are not currently employed**. Regarding residence, most respondents live in the **Soran Independent Administration (524)**, followed by **Erbil (138)**, with smaller numbers residing in Raperin, Duhok, and Slemani. Among working graduates, the **Soran Independent Administration** is also the main place of work, with **594 respondents**, followed by **Erbil with 138** and smaller numbers across other areas.

Overall, the collected data provides an initial picture of the university's graduate community and their **academic qualifications, employment status, residential locations, and work locations**. Since the survey is ongoing, these figures represent the **responses collected so far and should be considered preliminary rather than a complete record of all university graduates**.

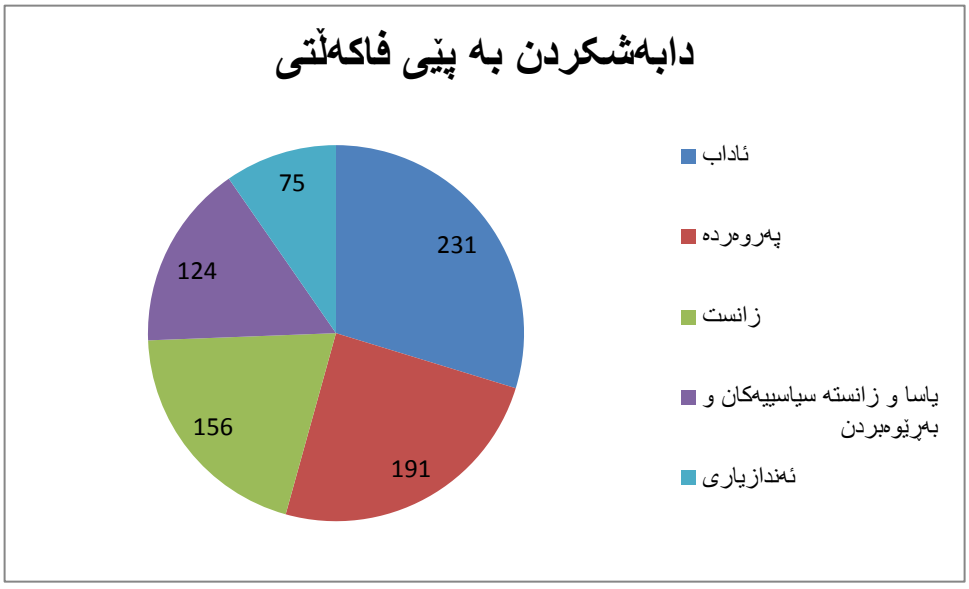

Graduation Year

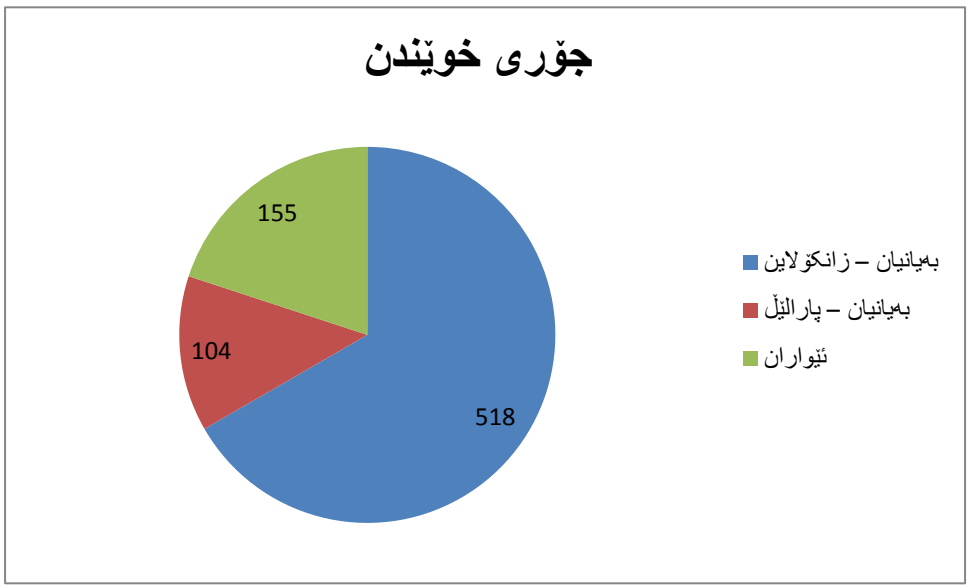

The chart illustrates the distribution of graduate responses according to their graduation year. The highest number of responses was recorded from the **2024–25 graduates, with 345 responses**, followed by **2023–24 with 195 responses** and **2022–23 with 110 responses**. The number of responses from earlier graduating classes was considerably lower, with **48, 26, and 21 responses** respectively. Overall, the chart shows that the majority of responses came from recent graduates.

Faculty

The chart presents the distribution of graduate respondents across the university's faculties. The **Faculty of Arts** recorded the highest number of respondents, with **231 graduates**, followed by the **Faculty of Education with 191** and the **Faculty of Science with 156**. The **Faculty of Law, Political Science and Management** contributed **124 respondents**, while **Engineering** had the lowest number, with **75 respondents**. Overall, the responses represent graduates from all five faculties.

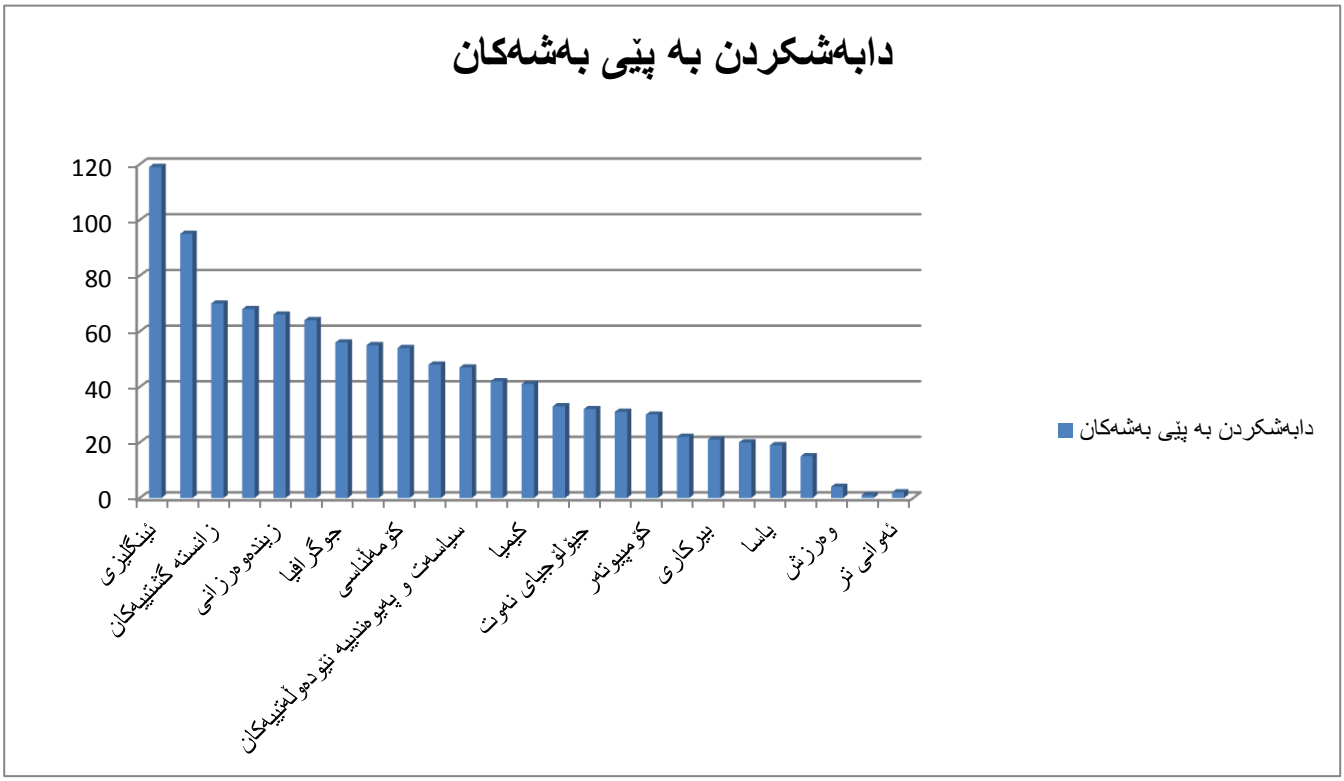

Study Type
