SPE Soran University Student Chapter

Annual Activities & Achievements Report

Academic Year 2025–2026

Submitted to:
Faculty of Engineering – Soran University

Prepared by:
SPE Soran University Student Chapter:
Kiyan Ali Sabri

Contents

1. **Executive Summary** 1
2. **Chapter Objectives** 1
3. **Activities Conducted During 2025–2026** 1
4. **Impact on Students** 2
5. **Collaboration & Professional Networking** 2
6. **Academic Research Sharing Initiative** 3

Main Objectives 3

1. Executive Summary

A formal introduction explaining the role of the SPE Soran University Student Chapter, its objectives, and its contribution to students, the Department of Petroleum Engineering, and the wider engineering community.

2. Chapter Objectives

For example:

• Promoting professional development among engineering students.
• Connecting students with petroleum engineers, academics, alumni, and industry professionals.
• Providing educational and technical activities beyond the classroom.
• Supporting students in career planning and professional preparation.
• Encouraging knowledge sharing and collaboration.
• Developing communication, leadership, teamwork, and critical-thinking skills.
• Creating stronger connections between students and graduates.

3. Activities Conducted During 2025–2026

Each activity would have its own section:

Activity 01 — Petroleum Engineering Alumni & Staff Reunion

Date, purpose, organization, participants, activities, outcomes, and photographs.

November 1, 2025
• Organized in collaboration with SPE North Iraq Section.
• Brought together alumni, professors, and staff.
• Lunch, live music, networking, memory corner, and professional connection.

Activity 02 — First-Stage Student Orientation

Purpose, content, student engagement, outcomes, etc.

November 25, 2025
• Introduction to SPE and the chapter.
• Helping new students understand university systems such as SIS and LMS.

• Welcoming first-stage students into the SPE community.

Activity 03 — Summer Training Q&A

Purpose, student participation, knowledge exchange, outcomes.

January 7, 2026

• Students shared their summer training experiences.
• Discussion of lessons learned, challenges, and advice for future trainees.
• Encouraged students to learn from one another.

Activity 04 — Career Path

Professional development, graduate–student interaction, lessons learned.

February 3, 2026

• A graduate shared his academic/professional journey.
• Discussion about career choices, work experience, skills, and preparing for the future.
• Direct connection between graduates and current students.

Activity 05 — SPE Book Club

Academic/personal development, selected books, discussions, outcomes.

4. Impact on Students

Rather than simply saying “the event was successful,” we can explain the actual educational and professional value of the activities.

For example:

Through its activities, the SPE Soran University Student Chapter sought to complement formal engineering education by creating opportunities for students to interact with professionals, graduates, and their peers. The activities provided students with exposure to career experiences, professional networking, practical knowledge, communication, and broader intellectual development.

5. Collaboration & Professional Networking

Especially highlighting the collaboration with **SPE North Iraq Section**, alumni, department staff, graduates, and other SPE chapters.

6. Academic Research Sharing Initiative

Activity Type: Academic Resource & Research Sharing

As part of the SPE Soran University Student Chapter's academic initiatives, the chapter began collecting students' research work with the aim of creating a shared academic platform for the university community.

The initiative was designed to make student research more accessible and encourage students to share their academic knowledge and experiences with one another. By creating an organized collection of previous student research, the activity provides students with opportunities to learn from existing work, explore research topics, and develop their own academic skills.

Main Objectives

- Make student research more accessible to the university community.
- Encourage academic knowledge sharing among students.
- Support academic growth and research culture.
- Help students benefit from previous studies and student experiences.
- Encourage collaboration and communication between students.
- Build a stronger academic environment where useful information is easier to access.

The initiative reflects the chapter's commitment to supporting students beyond traditional classroom learning and encouraging a culture in which academic knowledge is shared for the benefit of the wider university community.
