Soran University Mission alignment with Learning Outcomes (LOs)

The mission of Soran University emphasizes the creation and expansion of knowledge, the development of skilled and socially responsible individuals, and the preparation of graduates for the labour market through talent development and purposeful research aimed at national advancement. This mission is strongly reflected in the university's undergraduate learning outcomes, which translate these broad goals into measurable graduate attributes. In particular, the emphasis on knowledge generation and research is operationalized through outcomes that promote critical thinking, analytical skills, and the ability to conduct and present academic research. Likewise, the mission's focus on equipping students with knowledge, skills, and competencies is aligned with outcomes related to practical application, continuous professional development, and proficiency in modern technologies and languages. Employability is further reinforced through learning outcomes that highlight problem-solving, innovation, and project-based thinking. Moreover, the mission's commitment to social values and national development is embedded in outcomes addressing ethical awareness, sustainability, teamwork, leadership, and respect for cultural diversity. Overall, the learning outcomes demonstrate a coherent and comprehensive alignment with the institutional mission, effectively bridging strategic intent with educational practice and graduate capabilities.

Mission element	Related learning outcomes	Alignment
Creation and expansion of knowledge	LO2: critical thinking, analysis, information organization, and research preparation; LO6: creative problem-solving and project/institutional thinking	Strong
Nurturing individuals with information, knowledge, and skills	LO1: broad academic understanding and practical application; LO4: continuous personal and professional development; LO5: modern technology and language skills	Strong
Equipping graduates for the labour market	LO4: practical skills for development and implementation; LO5: technology, language, and workplace readiness; LO6: project and institutional problem-solving	Strong
Identifying and developing talents	LO1 and LO6: academic and creative abilities; LO7: self-management, teamwork, and leadership	Moderate to strong
Conducting informed and directed research	LO2: information analysis and research report preparation; LO6: using principles of design, development, and management in problem-solving	Strong
Developing the nation	LO3: ethical awareness and social values; LO4: sustainable development; LO7: responsible teamwork and leadership; LO8: multicultural awareness and respect for diversity	Strong, indirect

SORAN UNIVERSITY MISSION

Active involvement in creation and expansion of knowledge, nurturing individuals equipped with information, knowledge, skills and social values, and trained for the labour market through identifying and developing the talents, and conducting informed and directed research to develop the nation.

SORAN UNIVERSITY LEARNING OUTCOMES:

Soran University Learning Outcomes for Bachelor's Degree Programs

1. Graduates of Soran University possess a comprehensive understanding of academic thinking and academic disciplines within the framework of their specializations. According to their areas of expertise, they have the ability to apply knowledge in practical and innovative ways.
2. Graduates demonstrate critical thinking in the objective analysis of issues, organizing and analyzing information, conducting research, and preparing appropriate academic reports.
3. Graduates are conscious of ethical issues, societal rights, and social values.
4. Graduates possess knowledge and skills related to sustainable development and environmental protection. Furthermore, they have the ability to develop and implement sustainability practices and engage in continuous learning in their professional work and within society.
5. University graduates have technological and linguistic competencies—they are familiar with contemporary technology and, in addition to Kurdish (according to their specializations), they know another language—and can apply these skills in various fields of education and the labor market.
6. Graduates have managerial and creative thinking abilities; they are capable of utilizing entrepreneurship principles to identify job opportunities and to develop and manage personal and institutional projects.
7. Graduates behave responsibly and are capable of taking responsibility for themselves and their teams, functioning respectfully and effectively as individuals, members, and leaders of teams.
8. Graduates have awareness and deep understanding of multiculturalism and diversity, and in their professional work and society, they have the ability to accept, adapt to, and respect differences.
